

I entered a subject's name in the search fields and clicked the MNI search. The search returned no AFIS results. The DMV option was therefore selected.

The name was entered as LAST NAME: Stanley, FIRST NAME: Steven, however, once I clicked on the DMV results, the name populated incorrectly. The subject's first name populated as his last name. The subject's middle name populated as his first name. The subject's last name populated as his first name.

This caused the MNI search to be faulty as once the DMV result was selected the name in the search fields changed:

**Master Name Index - Search**

Click Here to Return to Entry Screen If Exact Match is Not Found

Name, Last: **STEVEN** First: **GORDON**

☒ Active Records ☐ Merged Records ☒ Alias Records

Middle Name:  Suffix:  ☐ Soundex

Date Of Birth:  /  /  Age From:  to:

Social Security:  -  -  Sex:  Race:  Ethnicity:

Height/From:  to:  Weight/From:  to:

Eye Color:

Records/Page: 10

Even though the subject already existed in the MNI database, the search came up negative because the name changed. Now the subject has a duplicated record under an incorrect name.

I also noticed there are multiple fields that are available in DMV data that did not populate once the DMV result was selected. The fields that are available from DMV data that did not populate on the PC are: race, social security number, height, weight, eye color, zip code, expiration year. See below:

Social Security: [ ] - [ ] - [ ] Sex: [M] Race: [ ] Ethnicity: [ ]  
 FBI #: [ ] State #: [ ] Veteran: [ ]  
 Height/From: [ ] to: [ ] Weight/From: [ ] to: [ ]  
 Eye Color: [ ] Hair Color: [ ]  
 Address: 6327 [ ] LANDIS [ ] DR [ ] Apt: [ ]  
 City: BATON ROUGE State: LA Zip: [ ] - [ ]  
 Phone: [ ] ( [ ] ) [ ] - [ ] Hours There/From: [ ] to: [ ]  
 Driver License: 9499510 State: LA Exp Year: [ ]

There is still much confusion on what the purpose of the arrest wizard is as the initial report was already created, however, this arrest wizard says no arrest was found.

Is there any way to take the data entered into the PC and transfer it into an incident report? Otherwise we are still duplicating data when we have to type the report.

On the Charges screen, the file number field should be a required field as several people are missing it and leaving it blank. Is there any way for this field to populate with the file number already entered on the Person screen with the option to edit the file number should it be necessary? On the "Charge Code" window, I typed "01" and this error popped up when I tried to add the charge. It is forcing me to select the charge code from the drop down menu rather than just quickly typing "01" and moving on. This is sometimes time consuming when the drop down menu take forever to populate.

Charge Code: PRO  
 Offense Type: [ ] Offense Location: [ ] File: [ ]  
 Warrant Number: [ ] Citation Number: [ ] State Code: [ ] Counts: [ ]
